You're most likely to get pregnant if you have sex within a day or so of ovulation (releasing an egg from the ovary). This is usually about 14 days after the first day of your last period, if your cycle is around 28 days long. An egg lives for about 12-24 hours after being released. For pregnancy to happen, the egg must be fertilised by a sperm within this time.

### How to Increase Chances of Getting Pregnant: What to Try

For the best chance of getting pregnant, you need to get your eggs and your partner's sperm together as often as possible. More than 8 out of 10 couples where the woman is aged under 40 will get pregnant within one year if they have regular unprotected sex. More than 9 out of 10 couples will get pregnant within two years.

### How to get pregnant | Tommy's

There are lots of factors that can affect your chances of getting pregnant, such as: Whether you have any reproductive problems, such as a history of pelvic inflammatory disease. Your age, your diet, your lifestyle and your job. Your partner 's age, his diet, his lifestyle and his job.

### How long will it take to get pregnant? - BabyCentre UK

The most optimal of all the sex positions to get pregnant is the traditional missionary position, where your partner is on top. This position is the best position to get pregnant because when the woman lies on her back, her vagina is tilted downwards toward the cervix, making it easier for the sperm to get through the cervix and into the uterus.
