The human circulatory system functions to transport blood and oxygen from the lungs to the various tissues of the body. The heart pumps the blood throughout the body. The lymphatic system is an extension of the human circulatory system that includes cell-mediated and antibody-mediated immune systems. The components of the human circulatory system include the heart, blood, red and white blood cells, platelets, and the lymphatic system.

Human Circulatory System

This revised human biology text is one of a series previously named "Revise Guides". It is designed to provide year-round study and reference back-up to the GCSE course, and provides an analysis of the syllabus and exam structure of relevant examining groups. The book offers helpful tips on study, revision and coursework, topic-by-topic coverage and self-text questions for checking progress, as well as a bank of recent GCSE questions with suggested answers for fine-tuning exam technique.

Browse the catalogue using the navigation below or to the left, use the site search tool to find particular study guides, or simply look through the complete list of books!

The Conversational Science series is a new (or, at least, different) approach to preparing for the latest version of the Medical College Admissions Test*. This bit is only my personal opinion, but I think the easiest way to do well on the MCAT is to understand the material. There's one heck of a lot of material, though, so how should you study the things you've already covered in class? This study guide is written in an informal tone of voice because you and I are having a conversation, and not a lecture. This study guide contains a limited number of crudely drawn figures. You're the person studying for the exam**, so I ask you to draw the rest of the figures for yourself. A figure that you draw yourself, even if you have no artistic talent whatsoever, teaches you much more than you can learn by simply looking at the beautiful, full-color, professionally drawn figures in your textbooks. This study guide has a limited number of review questions so you can check if you really did understand one chapter before you move on to the next. This study guide DOES NOT contain any practice exams. This is because (in my opinion, again, based on my experience as a student and as an instructor) the questions in the practice exams of many study guides are too often confusing, poorly written, and not at all like the actual questions on the actual exam. And, sometimes, the answers given for some questions on some practice exams are just plain wrong. This study guide may not be for everyone, but I think there's a good chance it'll help you convince yourself that you really do understand the material. *Medical College Admissions Test, MCAT, and MCAT2015 are registered trademarks of the Association of American Medical Colleges, which neither sponsors nor endorses this product. ** I took the MCAT way back in the middle of the 1980s, and I did very well, if I do say so myself.

This new edition covers all the Level 1 NCEA Biology and Human Biology Achievement Standards. All the year's work is covered with revision notes, examples, diagrams, illustrations and NCEA questions with all supplied. Use throughout the year to help with homework, to support and understand classroom work and to revise for assessments and exams. All the year's work is presented with revision notes, worked examples, diagrams and illustrations and NCEA questions with answers detailing NCEA grades.

This Biology study guide is created by Pamphlet Master for students everywhere. This tool has a comprehensive variety of college and graduate school topics/subjects which can give you what it takes to achieve success not only in school but beyond. Included in the pamphlet are: - Introduction to the Cell -Cell Membranes - Cell Differences -Biology Terms - Introduction to Intracellular Components - The Cytoskeleton and Cytosol - Cell Respiration - TERMS -Cell Respiration: Introduction - Glycolysis - Glycolysis - TERMS

"To provide the information and skills needed to enable students to prepare for all NCEA Biology Achievement Standards 1.1 to 1.8 and all NCEA Human Biology Achievement Standards 1.4 to 1.7"--Intro. Suggested level: secondary.

The perfect practice book for multiple choice and matching exercises that make up 20% of the final CIE Higher exam paper. This book offers ideal material for either classroom or homework activities, and allows students to construct a glossary of terms essential to the course, while banks of multiple choice questions enable them to practise extensively for the examination.

The CliffsStudySolver workbooks combine 20 percent review material with 80 percent practice problems (and the answers!) to help make your lessons stick. CliffsStudySolver Biology is for students who want to reinforce their knowledge with a learn-by-doing approach. Inside, you'll get the practice you need to master biology with problem-solving tools such as Clear, concise reviews of every topic Practice problems in every chapter!with explanations and solutions A diagnostic pretest to assess your current skills A full-length exam that adapts to your skill level Easy-to-understand tables and graphs, clear diagrams, and straightforward language can help you gain a solid foundation in biology and open the doors to more advanced knowledge. This workbook begins with the basics: the scientific method, microscopes and microscope measurements, the major life functions, cell structure, classification of biodiversity, and a chemistry review. You'll then dive into topics such as Plant biology: Structure and function of plants, leaves, stems, roots; photosynthesis Human biology: Nutrition and digestion, circulation, respiration, excretion, locomotion, regulation Animal biology: Animal-like protists; phyla Cnidaria, Annelida, and Arthropoda Reproduction: Organisms, plants, and human Mendelian Genetics; Patterns of Inheritance; Modern Genetics Evolution: Fossils, comparative anatomy and biochemistry, The hardy-Weinberg Law Ecology: Abiotic and biotic factors, energy flow, material cycles, biomes, environmental protection Practice makes perfect!and whether you're taking lessons or teaching yourself, CliffsStudySolver guides can help you make the grade. Author Max Rechtman taught high school biology in the New York City public school system for 34 years before retiring in 2003. He was a teacher mentor and holds a New York State certificate in school administration and supervision.

Offers advice about taking multiple choice and essay CLEP examinations; describes each subject on the test, including English, foreign languages, and history; and aids in the interpretation of scores.

Don't know much about biology? The Complete Idiot's Guide® to College Biology follows the curriculum of Biology 101 so closely that it serves as a perfect study guide, and it's also great for AP Biology and SAT Subject Biology exams that high school students are taking in droves. Students can turn to it when their textbooks are unclear or as an additional aid throughout the semester. ?The number of high school students who took AP Biology in 2008 increased 7 percent over the previous year (more than 154,000) ?College biology doesn't just lead to medical, dental, or veterinary school-biotechnology and biochemical jobs remain hot in today's job market ?Follows in the footsteps of The Complete Idiot's Guides® as a terrific supplementary reading for AP Biology, though it follows the curriculum of the college Intro to Biology course.
