As the practice of outplacement counseling continues to evolve, outplacement professionals are increasingly called upon to respond effectively to a rapidly changing set of counseling and business developments. One of the major trends is that the skills and expertise of outplacement practitioners are of value to individuals still employed within corporate organizations as well as to those who have already lost their jobs. Practitioners are designing programs and delivering services in the areas of executive coaching, organization development, internal career management, and more. Another trend is that career management professionals are challenged to provide effective services to an increasingly diverse group of candidates to ensure that they are maintaining the highest professional standards in their service delivery. And more attention is being given to innovative applications of technology to career management services. As a result of these evolving trends, the need has never been greater for career management professionals to think clearly about the services they deliver, to enhance their own professional development on an ongoing basis, and to respond effectively to changes in the labor market. One of the best ways to accomplish this growth is to fully tap the knowledge and experience of authorities in the field. The contributors to this volume are established industry leaders with demonstrated expertise in their areas of special interest. This volume is a valuable resource to all those interested in the fields of outplacement and career management-- especially current and "would-be" practitioners. Its contents will benefit candidates receiving career management services and human resources professionals whose organizations provide such services. It is also of interest to those from a variety of academic backgrounds including counseling psychology, organization development, and industrial/organizational psychology. For all of these audiences, this volume assembles practical, state-of-the-art information about important career development topics from a broad range of distinguished practitioners.

Information systems are shaped by the environment in which they operate, and e-Procurement in Emerging Economies: Theory and Cases explains how e-procurement is shaped in emerging economies. Once he realized what had happened to him, he enjoyed it all, except for a couple of very different and scary events. He explored. He encouraged others to help one of their own in need. He realizes along the way that as much is happening in the sea, as is happening on land, and he will no longer take the sea, and all that is in it, for granted.

For entrepreneurs ready to reach the next level of success, small business owner turned multibillionaire Tilman Fertitta shares the commonsense principles that have rocketed his worldwide hospitality empire to the top. For aspiring entrepreneurs or people in business, this book will help you take your company to the next level. When you put this book down, you'll know what you're doing right and what you're doing wrong to operate your business, and if you're just getting started, it will help set you up for success. Tilman Fertitta, also known as the Billion Dollar Buyer, started his hospitality empire thirty years ago with just one restaurant. So he knows the challenges that business owners face, as well as the common pitfalls that cause them to go under. Over the years he's stayed true to the principles that helped him scale his business to what is believed to be the largest single-shareholder company in America, with over \$4 billion in revenue, including hundreds of restaurants (Landry's Seafood, Bubba Gump Shrimp Company, Morton's Steakhouse, Mastro's, The Chart House, Rainforest Café, and over forty more restaurant concepts) and five Golden Nugget Casinos. He's also sole owner of the NBA's Houston Rockets. In *Shut Up and Listen!*, he shares the key insights that made it all possible. When entrepreneurs appear on Billion Dollar Buyer, the biggest obstacles they often face are ones they don't suspect: not knowing your numbers, not knowing your strengths and weaknesses, or not being willing to go that extra mile with your customers. Fertitta has seen it all. He knows that what you aren't paying attention to can either sink your business or become the very things that launch you to the top. As Fertitta says: "You might think you know what you're doing, but I'm going to show you what you don't know." Fertitta shares straight-talk "Tilmanisms" around six key action items that any entrepreneur can adopt today: Be the Bull No Spare Customers Change, Change, Change Know Your Numbers Follow the 95/5 Rule Take No Out of Your Vocabulary A groundbreaking, no-holds-barred book, *Shut Up and Listen!* offers practical, hard-earned wisdom from one of the most successful business owners in the world.

In reflecting upon my life as a neurosurgeon, perhaps the most salient feature is that period of history involved. Trained by men who studied under Harvey Cushing, considered the father of neurological surgery, we, as early third-generation neurosurgeons, were held to those rigid standards of academic achievement and physical endurance typical of that time. The reader first identifies with the young child who dreams of becoming a doctor, and then sets out on that long path. He then re-lives the experiences of the student of medicine, and later the rigorous demands placed upon the surgeon-in-training. During the later descriptions of the private practice of brain and spinal surgery, the book transitions into an educational experience. It presents to the reader a multitude of neurological disorders requiring surgical treatment, the relevant surgical anatomy and the operative techniques involved. Often interjected are the intangibles of surgical judgment and philosophy when confronting those in pain or critically ill. Of equal importance were the major scientific advancements which occurred during that period of medical history. No longer did we have to bore a hole in the skull, or inject noxious materials into the head or spinal canal to verify a diagnosis. Rather, we had been privileged to enjoy the development of such remarkable machines as the ultrasound, CAT, and MRI. Descriptions of these devices, among others, and their impact on medical practice should prove interesting to the inquisitive reader. After 21 years in practice, and probably at the height of my career as a surgeon, I contracted hepatitis B subsequent to an accidental needle puncture in the operating room. Forced to lay down the scalpel, I turned to my second childhood dream, cattle ranching, as an alternative vocation. This then becomes a secondary focus of the book. A medical colleague, after learning of my book, expressed an interest in learning the common denominator driving a man to both neurosurgery and ranching. One can summarize with the word, "counterpoise." I had always strived to achieve a balance between the in-hospital, academic, precision-oriented work of the neurosurgeon and the outdoor, physically-demanding life of a rancher? consummating the total American dream. Analogous to surgery I have always enjoyed using my hands in the shop. Throughout the book sections have been devoted to various aspects of woodworking, and an effort not only to share my enthusiasm but also to expose underlying problems and pitfalls; challenges I have encountered in striving to become an artisan of fine furniture. The practice of medicine has undergone significant change during my lifetime. Not only have I witnessed a burgeoning, unsustainable increase in the cost of healthcare, but also major changes in the way in which medicine is being practiced in the new millennium. Having been a proud product of the "Lucky Few" generation, born between the years 1929 and 1945, I am rightfully able to compare today's practice of medicine with those of the latter half of the 20th century.
