Some say that he was bound by the cultural norms of his era to suppress the roles of women, but no one has been able to prove that this was his motive. Furthermore, this accuses Jesus of sexism and it paints an inaccurate portrait of Christ, who had no qualms about shattering the cultural norms regarding interaction with women (Matt. 9:20; Luke 7:37; John 4:27).

In the 1830s, when a brave and curious girl named Elizabeth Blackwell was growing up, women were supposed to be wives and mothers. Some women could be teachers or seamstresses, but career options were few. Certainly no women were doctors. But Elizabeth refused to accept the common beliefs that women weren't smart enough to be doctors, or that they were too weak for such hard work. And she would not take no for an answer. Although she faced much opposition, she worked hard and finally—when she graduated from medical school and went on to have a brilliant career—proved her detractors wrong. This inspiring story of the first female doctor shows how one strong-willed woman opened the doors for all the female doctors to come.

The daughter of internationally acclaimed poet Lord Byron, Ada was tutored in science and mathematics from a very early age. But Ada ' s imagination was never meant to be tamed and, armed with the fundamentals of math and engineering, she came into her own as a woman of ideas—equal parts mathematician and philosopher. In 2013 Georg Baselitz declared that 'women don't paint very well'. Whilst shocking, his comments reveal what Helen Gørrill argues is prolific discrimination in the artworld. In a groundbreaking study of gender and value, Gørrill proves that there are few aesthetic differences in men and women's painting, but that men's art is valued at up to 80 per cent more than women's. Indeed, the power of masculinity is such that when men sign their work it goes up in value, yet when women sign their work it goes down. Museums, the author attests, are also complicit in this vicious cycle as they collect tokenist female artwork which impinges upon its artists' market value. An essential text for students and teachers, Gørrill's book is provocative and challenges existing methodologies whilst introducing shocking evidence. She

proves how the price of being a woman impacts upon all forms of artistic currency, be it social, cultural or economic and in the vanguard of the 'Me Too' movement calls for the artworld to take action.

Shows couples ways to improve communication, and discusses giving and receiving criticism, and reexamines popular stereotypes

No matter one ' s political persuasion, most of us agree there ' s something deeply wrong in America today. Conflict has reached a fever pitch as our nation has become alarmingly polarized in the political arena. Many look to politicians and public policies for solutions, but journalist Andrew Breitbart rightly said that politics couldn ' t be fixed if culture is ignored, because “ politics is downstream from culture. ” McAllister would take this observation a step further—politics might be downstream from culture, but

culture is downstream from relationships. If we don't focus on the personal building blocks of society, we will fail to fix problems in culture and the politics that flow from it. If relationships are sick or broken—especially those between men and women—then everything else is affected. If there's little love, respect, and trust there, you won't find it anywhere else. Men are tired of being dumped on. They have a lot to say to women about sex, equality in the workplace, raising boys, and the lie of “toxic masculinity,” but modern feminism and a politically correct culture have silenced them. This “war on men” has disrupted relationships and caused men to question their place in American society. “Misogyny,” “male privilege,” and “the Patriarchy” are buzzwords that shut men down. Some

are so frustrated they ' ve given up entirely— “ Who needs women if all they ' re going to do is use you and treat you like garbage? ” Anger, separation, and simply giving up aren't solutions to a festering problem. Instead, we need to heal relationships by learning to respect the designed purposes of masculinity and femininity. For this to happen, women will need to hear some hard truths about themselves and those they love. In *What Men Want to Say to Women (But Can ' t)*, cultural commentator and New York Times bestselling author Denise McAllister speaks to women on men ' s behalf—exposing the lies of modern feminism and offering insights on how to rebuild broken relationships in the workplace, at home, and in the bedroom. Here ' s a sneak peek at a few things men would like to say to women,

Denise McAllister doesn ’ t just want to fix how men and women talk to each other. She wants to heal a fraying holy sacrament. When Ada Calhoun found herself in the throes of a midlife crisis, she thought that she had no right to complain. She was

married with children and a good career. So why did she feel miserable? And why did it seem that other Generation X women were miserable, too? Calhoun decided to find some answers. She looked into housing costs, HR trends, credit card debt averages, and divorce data. At every turn, she saw a pattern: sandwiched between the Boomers and the Millennials, Gen X women were facing new problems as they entered middle age, problems that were being largely overlooked. Speaking with women across America about their experiences as the generation raised to “have it all,” Calhoun found that most were exhausted, terrified about money, under-employed, and overwhelmed. Instead of their issues being heard, they were told instead to lean in, take “me-time,” or make a chore chart to get their lives and

homes in order. In *Why We Can't Sleep*, Calhoun opens up the cultural and political contexts of Gen X's predicament and offers solutions for how to pull oneself out of the abyss—and keep the next generation of women from falling in. The result is reassuring, empowering, and essential reading for all middle-aged women, and anyone who hopes to understand them.

AND THE ECONOMIST When Anne-Marie Slaughter accepted her dream job as the first female director of policy planning at the U.S. State Department in 2009, she was confident she could juggle the demands of her position in Washington, D.C., with the responsibilities of her family life in suburban New Jersey. Her husband and two young sons encouraged her to pursue the job; she had a tremendously supportive boss, Secretary of State Hillary Clinton; and she had been moving up on a high-profile career track since law school. But then life intervened. Parenting needs caused her to make a decision to leave the State Department and return to an academic career that gave her more time for her family. The reactions to her choice to leave Washington because of her kids led her to question the feminist narrative she grew up

with. Her subsequent article for The Atlantic, “ Why Women Still Can ’ t Have It All, ” created a firestorm, sparked intense national debate, and became one of the most-read pieces in the magazine ’ s history. Since that time, Anne-Marie Slaughter has pushed forward, breaking free of her long-standing assumptions about work, life, and family. Though many solutions have been proposed for how women can continue to break the glass ceiling or rise above the “ motherhood penalty, ” women at the top and the bottom of the income scale are further and further apart. Now, in her refreshing and forthright voice, Anne-Marie Slaughter returns with her vision for what true equality between men and women really means, and how we can get there. She uncovers the missing piece of the puzzle, presenting a new

focus that can reunite the women ' s movement and provide a common banner under which both men and women can advance and thrive. With moving personal stories, individual action plans, and a broad outline for change, Anne-Marie Slaughter reveals a future in which all of us can finally finish the business of equality for women and men, work and family. “ I ' m confident that you will be left with Anne-Marie ' s hope and optimism that we can change our points of view and policies so that both men and women can fully participate in their families and use their full talents on the job. ” —Hillary Rodham Clinton
